

Фрезер СМТ за дърво профилен комплект ф 8 мм, 3 бр., 800.524-900.024

These 3 piece sets will produce beautiful raised panel doors with a classic bevelled profile. Designed for use in fine furniture making, these sets include two matched cope and stick bits to produce frames from 15,87mm to 19mm in thickness. The stick bit shapes a decorative 4,76mm thumbnail moulding along the edge of the frame. The panel bit is designed for 12,7mm thick material. All bits are equipped with guide bearings for shaping curved work such as the small arched panel doors seen on secretaries and corner cabinetry. These sets also produce panels for small chests, lids for small boxes, or drawer fronts. Instructions included.

Tungsten carbide tipped

Three cutting edges

Right-hand rotation

Anti-kickback design

Tool with bearing

Not for hand held use for
router table only
