

The Blocks Saw - Bali 500

The saw cuts any kind of construction material, specially prefabricated concrete blocks, porotherm blocks, Ytong blocks, large bricks, etc with a cutting depth of 20 cm in one single pass.

The cutting head can be easily adjusted to different cutting depths.

The BALI is a robust saw with a low vibrations level and improved performance courtesy of the diamond blade.

The sliding cart is equipped with prismatic shaped wheels, which slide on similar shaped guides, assuring maximum stability.

Ideal for RENTAL COMPANIES. The model can be hired out with confidence for cutting standard materials:

Bricks, Tiles, Terrazzo, Granite

and special materials:

Prefabricated concrete blocks, Porotherm blocks, Ytong blocks, Large bricks, Oversized stoneware

NOT A CLUE WHAT YOU ARE TRYING TO SAY HERE.
